

Sub B1
7. (Amended) A method for processing requests for products comprising the steps,
performed by a processor, of:

storing in a database a set of bundle codes, each bundle code indicating a set of products
offered by a provider;

receiving a request identifying a customer and including a bundle code [indicating one of
a plurality of providers for selected products];

converting a portion of the received request into a set of provisioning requests based on
the received bundle code; and

providing the provisioning requests to the providers.

Sub B2
22. (Amended) A billing controller for processing requests for products comprising:
a database configured to store a set of bundle codes, each bundle code indicating a set of
products offered by a provider;

a receiver configured to receive a request identifying a customer and including a bundle
code [indicating one of a plurality of providers for selected products];

a converter configured to convert a portion of the received request into a set of
provisioning requests based on the received bundle code; and

a component configured to provide the provisioning requests to the providers.
